COM2 RECYCLING SOLUTIONS

ANNOUNCEMENT:

We are excited to announce that **Town of Addison** from **Washington County** in collaboration with **COM2** will be providing it's residents **FREE ELECTRONICS RECYCLING SERVICES**.

WHY E-CYCLE?

According to a 2023 UN report, the world produced over **137 billion** pounds of e-waste, with less than a quarter being recycled. This means a staggering amount of e-waste ends up in landfills, creating a ticking time bomb for our environment. But why does it matter? Unrecycled e-waste releases harmful toxins into our air, water, and soil, leading to severe environmental and health consequences. While we might not see the effects immediately, the longterm damage is undeniable.

SOLUTION :

Electronics are complex and packed with valuable materials that can be recovered and reused. The solution to the e waste problem lies in a Sophisticated approach that involves responsible recycling, innovative upcycling and proactive education on the need to recycle electronic waste. By establishing an efficient recycling program, we can ensure that valuable materials are recovered and reused, reducing the strain on our planet.

COM2 IS THE ANSWER!

COM2 is the ultimate solution to all your e-waste problems. We aim at providing efficient ELECTRONIC RECYCLING SERVICES to residents, municipalities, schools, businesses and so on. Lets lead the charge in responsible e-waste management and make a lasting impact on our planet.
